## LABORATORY RESULT

<b>Name</b>	Adhitya Trinanda Saputro	<b>Sample #</b>	aD1u7500220719001
<b>ID/NIK</b>	3403021007970001	<b>Clinic ID</b>	41d9c45f905b492b15e4265fbbd12d53c529b817
<b>Date of Birth</b>	1997-07-10	<b>Lab ID</b>	14176e6edcda80ebc255f16df823ddafbf095331
<b>Phone</b>	+6281329147500	<b>Date Collected</b>	19 Jul 2022 09:40:46
<b>Email</b>	adhityasaputra39@gmail.com	<b>Date Received</b>	19 Jul 2022
<b>Gender</b>	Male	<b>Date Reported</b>	20 Jul 2022

Test	Specimen	Result	Normal Range
RT PCR SARS CoV-2	Nasopharyngeal - Oropharyngeal	Positive	Negative
ORF1ab		36.49	(Cut off CT value 38)
N gene		32.71	(Cut off CT value 38)

Approved By Dr. Tutu Rizkianti, Sp. PK

20 Jul 2022 01:40:43

## Notes

- These results describe the patient's condition at the time of specimen collection
- PCR Examination detects viral genetic material without being able to determine whether the virus is alive or dead
- CT Value can describe the concentration of viral genetic material but is not absolute ( relative ), influenced by the reagent used, technical work and specimen collection
- CT Value should be interpreted with care. Doctor who requests a PCR examination for COVID-19 can contact a specialist clinical microbiologist in charge of results. If necessary, explanation.
- If the result is positive, do self-isolation immediately and call emergency number 119 extension 9 to get medical help
